DETAILED ACTION

Introduction

1. This office action is in response to applicant's amendment filed 1/26/10. Claims 1, 7-24, 27, 31 and 34-37 are currently pending. All IDS filed have been considered. The Examiner acknowledges applicants foreign priority claim to **8/31/1998**.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/21/2010 has been entered.

Allowable Subject Matter

3. Claims 1, 7-24, 27, 31 and 34-37 are allowed.

The following is an examiner's statement of reasons for allowance:

The instant application is deemed to be directed to a non-obvious improvement over the invention patented in Yamauchi, Fushimoto,

Fushimoto II, wherein Yamauchi teaches language translation including converting a source language input into multiple representations within the source language and confirming at least one representation as being closest in meaning to the inputted first natural language. Fushimoto teaches language translation wherein a plurality of representations of the second natural language has a one-to-one correspondence with a representation of a third natural language. Fushimoto II teaches language translation wherein at least one representation of a second natural language that is translated into a third natural language is at least one sentence. However neither Yamauchi, Fushimoto or Fushimoto II, alone or in obvious combination teaches:

Regarding claim 1, "confirm at least one of the converted representations as being **closest in meaning to the inputted first natural language, the confirmed representation being unmatched to any first attributes of a template table such that the confirmed representation is unsuitable for translation**,

re-convert the confirmed at least one representation to a re-converted representation within the first natural language by **exchanging word order of the at least one representation**, the re-

converted representation **matching at least one of the first attributes of the template table** such that the re-converted representation is suitable for translation"

Regarding claim 17, "confirm at least one representation being closest in meaning to the inputted natural language, the confirmed representation being **unmatched to any first attributes of a template table such that the confirmed representation is unsuitable for translation;**

re-convert the plurality of confirmed representations into a plurality of re-converted representations of the natural language by exchanging word order within the plurality of representations, the re-converted representation **matching at least one of the first attributes of the template table** such that the re-converted representations are suitable for translation"

Regarding claim 27, "confirm the converted first natural language as being closest in meaning to the inputted first natural language, **the confirmed representation** being **unmatched to any first attributes of a template table such that the confirmed representation is unsuitable for translation,**

re-convert the converted first **natural language** to a **re-converted representation within the first natural language** by **exchanging word order** of the first natural language, the re-converted representation **matching at least one of the first attributes of the template table** such that the re-converted representation is suitable for translation.”

Regarding claim 31, “confirm at least one representation **closest in meaning to the inputted natural language**, the confirmed representation being **unmatched to any first attributes of a template table such that the confirmed representation is unsuitable for translation**;

re-convert the plurality of confirmed representations into a plurality of **re-converted representations of the natural language** by **exchanging word order within** the plurality of representations, the re-converted representation **matching at least one of the first attributes of the template table** such that the re-converted representations are **suitable for translation.**”

4. Dependent claims 7-16, 18-24, 34-37 are allowed as their respective independent parent claims have been allowed.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
